DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-14 are rejected under 35 U.S.C. 102(e) as being unpatentable by Banga et al (U.S. 5,931,904).

As per claims 1,6,11 Banga disclosed a method of enhancing data delivery comprising: sending a first packet from a client interface to a remote terminal at a first time; receiving at the client interface a second packet from the remote terminal at a second time; determining a response time of the remote terminal at the client interface based on a time period between the first time and the second time (col. 3, lines 22-36); using said response time to determine information related to a connection speed between the remote terminal and the client interface; providing a plurality of different content versions, each is having a different amount of information, each content version being optimized for a specific connection speed (col. 3, lines 3-15); based on said determined connection speed, automatically selecting a content version from said plurality of content versions; and is providing the remote terminal with the selected content version (col. 5, lines 32-47).

As per claim 2 Banga disclosed further comprising determining a data flow rate from the determined response time of the remote terminal, and wherein the determining the response time comprises: starting a timer at the first time when the client interface sends the first packet to the remote terminal; and stopping the timer at the second time when the client interface receives the second acknowledgement packet from the remote terminal (col. 6, lines 53-66).

3. As per claims 3,13 Banga disclosed further comprising determining network congestion based on the determined response time (col. 4, lines 29-47).

4. As per claims 4,14 Banga disclosed further comprising determining the response time based on a timing of a handshake between the remote terminal and the client interface (col. , lines 58-67 & col. 2, lines 1-4).

5. As per claim 5 Banga disclosed wherein selecting the destination address from a plurality of addresses is based on a requested address by the remote terminal and the determined response time (col. 6, lines 53-66).

6. As per claim 7 Banga disclosed further comprising determining a data flow rate from the remote terminal based on the response time(col. 4, lines 29-47).

Art Unit: 2145

7. As per claim 8 Banga disclosed wherein the requested destination address includes a main destination address and a plurality of sub-addresses, each of said sub-addresses corresponding to a connection speed and optimized for a said connection speed (col. 2, lines 1-11).

8. As per claim 9 Banga disclosed further comprising determining a network congestion based on the determined response time (col. 4, lines 29-47).

9. As per claims 10,12 Banga disclosed further comprising connecting the remote terminal to the selected destination address (col. 5, lines 48-67).

Conclusion

10. Any inquiry concerning this communication or earlier communication from the examiner should be directed to Adnan Mirza whose telephone number is (571)-272-3885.
